EDUCATION

University of Colorado Boulder, Engineering Honors Program

Boulder, CO

Bachelor of Science – Mechanical Engineering

August 2024 – May 2028

Minor – Engineering Management

Relevant Coursework: Thermodynamics, Fluid Mechanics, Statics and Structures, Component Design, Mechanics of Solids, Computational Methods, Materials Science, Differential Equations, Linear Algebra

Activities: CU Formula SAE, CU Fly Fishing Club Officer, Alpha Tau Omega Executive Board

ENGINEERING EXPERIENCE

Engineering Intern

June – July 2026

ESAB Corporation

Hanover, PA

- Created, prototyped, and tested new ESAB products with R&D department, focusing on electrodes, welding wire, and hardfacing product lines
- Designed and built a custom AI model to automate product testing data analysis for the 8-person engineering team, cutting data access time to just 8% of the original duration
- Completed a literature review of Wire Arc Additive Manufacturing and worked with ESAB clients to apply WAAM to large-scale naval, aerospace, and oil and gas pipeline projects
- Coordinated with expert test welders and various ESAB offices around the world to improve product development and testing procedures

Powertrain Engineer – CU Boulder Formula SAE

September 2024 – Present

- Created and manufactured a custom powertrain for a student-built race car with fellow CU engineering students
- Designed specific elements such as the air intake, chain guard, and spacers using SolidWorks, FEA, drafting, topological optimization, and GD&T techniques
- Machined each designed part using lathes, drills, saws, and CNC mills
- Successful design, manufacture, and assembly of entire vehicle in a 9-month time frame while coordinating with multiple other subteams
- Team placed 31st and 60th in the Formula SAE 2025 and 2026 Championship

Tensentric Human-Centered Design Award

September – December 2024

- Designed and fabricated a portable camping stove attachment for safer outdoor cooking on uneven ground
- Led CAD and prototyping phases within a team of four peers using SolidWorks and OnShape
- Competed at the 2024 Collegiate Engineering Design Expo, featuring 89 teams and over 500 students
- Won the Tensentric Human-Centered Design Award as the team which “best optimized user experience”

ILF Youth Innovation Contest Bronze Winner

May - August 2021

- Developed wireless electric car charger in a team of three, including prototype, cost, and market assessment
- Built fully accurate simulations of large-scale manufacturing using quantitative modeling
- Presented to prominent STEM leaders from over 80 countries, placed 3rd out of 68 high school and college teams

ADDITIONAL EXPERIENCE

Server – Topgolf

May – August 2025

- Order-taking and transport of food, beverages, and necessary kitchen items throughout the establishment
- Reliable, professional communication with customers, team members and managers to fulfill duties

Caregiver for Neighbor with Cerebral Palsy

June 2020 – August 2024

- Before and after-school care for a local woman with Cerebral Palsy, including lifting her from bed to wheelchair and back, as well as other caregiver responsibilities
- Over 2500 care-giving visits fulfilled during high school in reliable, courteous fashion

Varsity Rowing, DC National Rowing Club

August 2021 – June 2024

- Multiple medal-winning rower across over 30 competitive races
- Two-time National Championship qualifier, consistently among top four teams in the Mid-Atlantic region

SKILLS

Software: SolidWorks (CSWA), Siemens NX, OnShape, ANSYS FEA + CFD, Excel, MATLAB, Python, Java, JavaScript

Machining: Welding (TIG, MIG, Stick Electrode), CNC Milling, Lathes, Saw, Drills, 3D printing
